PROFESSIONAL SUMMARY

Computer Engineering graduate specializing in **cloud infrastructure design, backend API integration, and data systems testing**. Deployed scalable architectures within cross-functional teams and engineered optimized software engines under strict resource constraints. Focused on **eliminating system bottlenecks** and delivering clean, highly maintainable codebases.

EDUCATION

University of Indonesia | *Bachelor of Engineering* [August 2021 - August 2025]
GPA: 3.55 out of 4.00

CORE COMPETENCIES

- **Software & Languages:** Python, SQL, C++, JavaScript, HTML/CSS, Unity Engine (C#).
- **Cloud & Infrastructure:** Google Cloud Platform (App Engine, Cloud Run), Firebase Auth, RESTful APIs.
- **Systems & Networking:** TCP/IP, Subnetting, **Cisco Packet Tracer**, Wireshark, Linux/Unix, Git.
- **Data & Analytics:** Advanced Excel (**Pivot Tables**, VLOOKUP), Data Architecture Mapping

PROJECTS

Bangkit Academy Capstone Project | *Cloud Computing Engineer* [May 2024]

- Co-engineered cloud infrastructure for a mobile application supporting book tracking and ML-driven recommendations within a 6-person cross-functional team.
- Deployed Google Cloud App Engine services to manage core backend workloads, ensuring seamless data communication between mobile frontend, external APIs, and ML models.
- Integrated Firebase Authentication pipelines to secure user management systems and streamline endpoint authorization.

Digital and Network Labs | *Core Academic Portfolio* [Aug 2021 – Dec 2023]

- Engineered a relational database web application featuring session-based user authentication and secure data persistence pipelines.
- Simulated secure enterprise network topologies using Cisco Packet Tracer, optimizing IP allocation via custom subnetting.
- Architected an IoT-to-Cloud speech-to-text pipeline interfacing low-resource ESP32 microcontrollers with Google Cloud Speech-to-Text APIs.

COURSES AND CERTIFICATIONS

- **Cloud Computing Graduate** – Bangkit Academy (Google, GoTo, Traveloka)
- **CCNA (ITN, SRWE, ENSA)** – Cisco Networking Academy
- **Data Analyst Bootcamps** – KarirNex, RevoU, Digital Skills Area
- **Cybersecurity Training Ecosystem** – TryHackMe (Advent of Cyber 2022–2025)

ORGANIZATIONAL EXPERIENCES

KMK Teknik Universitas Indonesia | *Staff Litbang* [Jan 2022 - Jan 2024]

- **Analyzed work programs** for **10+ core initiatives** to deliver data-backed quality improvements.
- **Managed feedback datasets** from **1,000+ total respondents** to engineer monthly quality control reports.
- **Monitored personnel metrics** for **10+ staff members** via HR evaluation framework.
- **Conducted cross-functional performance audits** for the PSDM division to identify operational bottlenecks and optimize program alignment.
